

Outline

- 1. INGO approaches
- 2. Partnership with non-state armed group
- 3. Ethnic capacity
- 4. Possibilities for transformation?

Ethnic health system development

1. Current INGO approaches

Too technocratic

Volunteerism should be based on

ability not availability

2. Partnership

Legitimate partnership with non-state armed

group

But complex working within military structures

3. Ethnic civil society capacity

Negative = Global shift in funding away from

ethnic CSOs to the Myanmar state

Positive = This INGO still working with ethnic CSO

Possibilities for transformation?
